Clean set f amended claims.

1. A decorative molding wrapping film for decorating a molding, said decorative molding wrapping film comprising at least one hot transfer inked foil carried on a carrier having said at least one said hot transfer inked foil laminated onto a planar wrapping film thereby creating said decorative molding wrapping film wherein said carrier is removed from said decorative molding wrapping film and said decorative molding wrapping film is wound upon a roll for use in wrapping of a substrate.

2. A decorative molding wrapping film as in claim 1 wherein said decorative molding wrapping film has at least one other hot transfer foil layered onto said decorative wrapping film thereby creating said decorative molding wrapping film wherein said carrier is removed from said decorative molding wrapping film and said decorative molding wrapping film is wound upon a roll for use in wrapping of a substrate.

3. A decorative molding wrapping film as in claim 2 wherein said decorative molding wrapping film has an adhesive applied to a side of said decorative molding wrapping film opposite said one other hot transfer foil, said decorative molding wrapping film wrapped about a substrate to be decorated.

4. A decorative molding wrapping film as in claim 1 wherein said decorative molding wrapping film has an adhesive applied to a side of said decorative molding wrapping film opposite said hot transfer foil, said decorative molding wrapping film wrapped about a substrate to be decorated.

5. A decorative molding wrapping film as in claim 1 wherein said at least one said hot transfer inked foil is a translucent hot transfer foil.

6. A decorative molding wrapping film as in claim 1 wherein said at least one said hot transfer inked foil is an opaque hot transfer foil.

7. A decorative molding wrapping film as in claim 2 wherein said at least one said hot transfer inked foil is an opaque hot transfer foil.

8. A decorative molding wrapping film as in claim 7 wherein said at least one said other said hot transfer inked foil is a translucent hot transfer foil.

9. A decorative molding wrapping film as in claim 2 wherein said at least one said hot

transfer inked foil is a translucent hot transfer foil.

10. A decorative molding wrapping film as in claim 9 wherein said at least one said other said hot transfer inked foil is a translucent hot transfer foil.

11. A decorative molding wrapping film comprising at least one hot transfer inked foil carried on a carrier, said at least one said hot transfer inked foil laminated onto an embossed wrapping film thereby creating a laminated embossed wrapping film wherein said carrier is removed from said laminated embossed wrapping film and said embossed laminated wrapping film is wound upon a roll for use in wrapping of a substrate.

12. A decorative molding film as in claim 11 wherein said embossed laminated wrapping film has at least one other hot transfer foil layered onto said embossed layered film thereby creating a laminated embossed wrapping film wherein said carrier is removed from said laminated embossed wrapping film and said laminated embossed wrapping film is wound upon a roll for use in wrapping of a substrate.

13. A decorative molding film as in claim 12 wherein said laminated embossed wrapping film has an adhesive applied to a side of said laminated embossed wrapping film opposite said one other hot transfer foil, said laminated embossed wrapping film wrapped about a substrate to be decorated.

14. A decorative molding film as in claim 11 wherein said laminated embossed wrapping film has an adhesive applied to a side of said laminated wrapping film opposite said hot transfer foil, said laminated embossed wrapping film wrapped about a substrate to be decorated.

15. A decorative molding film as in claim 11 wherein said at least one said hot transfer inked foil is an opaque hot transfer foil.

16. A decorative molding film as in claim 11 wherein said at least one said hot transfer inked foil is a metallic hot transfer foil.

17. A decorative molding film as in claim 11 wherein said at least one said hot transfer inked foil is a translucent hot transfer foil.

18. A decorative molding film as in claim 12 wherein said at least one said hot transfer inked foil is an opaque colored hot transfer foil.

19. A decorative molding film as in claim 12 wherein said at least one said other hot
